

# Civica Dox Inventory

Digital inventory management built to support hospitals with supply management accuracy, efficiency, and cost savings.

Civica Dox Inventory is a user-friendly solution that simplifies inventory management for hospitals. By automating purchasing, reducing costs, and enhancing stock control, it improves the efficiency of medical supply management.

With its intuitive navigation, Civica Dox Inventory seamlessly supports procurement processes, eliminating the need for manual stock management tasks. It automates reordering and integrates smoothly with suppliers' systems, saving time and ensuring accuracy.

Our solution empowers hospital procurement teams by enabling them to source alternative items from multiple vendors, ensuring the best pricing for every purchase. Additionally, it provides data-driven insights through supplier performance analysis, enabling better informed decision-making.

Civica Dox Inventory simplifies the management of stock with serial and batch-controls, including prostheses procedures, consignment stock, and replenishment of orders. It reduces administrative burdens and allows for streamlined procurement operations.

Furthermore, the solution seamlessly integrates with other hospital systems, creating an efficient and controlled infrastructure.

### Why choose Civica Dox:

-  Improved inventory control with robust tracking capabilities delivering real-time visibility into stock levels, locations, and expiration dates.
-  Automated medical procurement operations, less paperwork, and better managed stock.
-  Allows for specialised handling capabilities tailored to meet the unique requirements of hospitals delivering specialised surgeries.

## Benefits:

**Streamlined operations:** Civica Dox Inventory automates procurement processes to improve accuracy in inventory management and improve stock data integrity.

**Improved financial performance:** By optimising procurement strategies and leveraging data-driven insights, Civica Dox Inventory helps hospitals achieve significant cost savings.

**Better stock control:** Civica Dox Inventory ensures the availability of essential supplies, minimise stockouts and reducing excess inventory.

**Enhanced decision-making:** Offering data-driven insights and supplier performance analysis, Civica Dox Inventory empowers hospitals to make informed decisions, leading to better purchasing choices and improved efficiency.

**Seamless integration:** Civica Dox Inventory seamlessly integrates with other hospital systems, ensuring compatibility and a cohesive infrastructure, minimising disruption and optimising workflow.

**NSQHS v2 compliant:** Created and tailored for the Australian market, Civica Dox Inventory meets the National Safety and Quality Health Service (NSQHS) standards, ensuring that hospitals provide safe and effective care.

## Technical features:

- Allows for procedure and surgeon-based preference cards setup.
- Automatically selects preference cards based on PAS information.
- Employs exception-based counting for varying equipment and supplies used in surgeries.
- Generates appropriate journal entries for general ledger accounts and keeps the Dox Analysis system up to date with actual costs for accurate financial tracking and analysis.
- Provides intuitive interface for nursing-staff involved in inventory management.
- Supports management and optimisation of procurement processes within enterprise-wide supply contracts.
- Enables margin calculation by cross-referencing revenue from the billing system and provides visibility into back-orders on suppliers.
