

Authority Connect - Employee Kiosk

Manage your payslips and leave remotely, reducing administration effort and time

Authority Connect is the mobility app of Authority, with multiple capabilities.

Here we are focusing on **Employee Kiosk**.

The Employee Kiosk capability replicates features of the Authority Employee Kiosk in a mobile app. It allows users to view and manage employment related information such as leave requests, pay slips and contact information from their mobile device anywhere and at any time. Any activity performed within the app is synchronised with Authority, making it seamless for users and reducing the burden on System Administrators.

- **Offline Access**
Get access with or without internet coverage. When you're back in range, Authority Connect will automatically sync with Authority.
- **Secure Access**
Users can be confident that Authority data is secure and Administrators have full control over who can access Authority Connect.
- **External Access**
Users are able to access and update data in Authority securely via a cellular network in the field.
- **Intuitive User Interface & Experience**
Quickly and intuitively use Authority Connect without intensive training.
- **Upload Attachments**
Users can upload new attachments quickly from the device camera or gallery which saves valuable time compared to independently taking photos and uploading into Authority at a later point.
- **View and Update Contact Details**
Users are able to easily access this information from anywhere without the need to access Authority. This promotes employees to keep their contact information up to date.
- **Support for multiple positions**
Takes away complexity with the ability for users to managing their leave and pay in multiple positions.
