CIVICA

Authority Connect - Procure to Pay

Driving efficiencies and savings through a streamlined and integrated procurement process

Intuitive and mobile, Civica's new Authority Connect Procure to Pay helps you achieve maximum value.

What is Authority Connect?
Connect is the only app you need with Authority. Any new mobile capability that we add to Authority will be added to Connect.

What is Authority Connect Procure to Pay?
Using the Authority Connect App, you can view your organisation's purchase and invoice information on your mobile device. In seconds, you can view, approve, and manage your purchase orders and invoices. All that on the go.

The Authority Connect - P2P add-on replicates the features of the Authority P2P Module in a mobile app. Any activity performed within the app is synchronised with Authority, making it seamless for all and reducing overhead for System Administrators.

Authority Procure to Pay gives you a single source of truth
By using the Authority Procure to Pay module, organisations can benefit from a fully integrated, effective procure-to-pay process, allowing officers to request goods and services through simple, browser-based screens, and having an overview of all invoices and council actions in a single dashboard. P2P automates all the requisitioning, authorisation, purchasing and receiving functions. The module provides a true 'requisition to reconciliation' solution. It helps ensure that maximum value is achieved in the procurement process.
